All BV's quoted for animals born 2019 were taken from the A/H (across herds) run dated 4 October 2021 Run Number 3867. Herd sire stags BV's quoted are from the A/H run dated October 2021. IOA (inches of antler) is a term now recognised as a measurement of live stags in hard antler, which is equivalent to the SCI scoring method.

Welcome

On the back of over 25 years of recorded Red Deer breeding at Wilkins Farming Co and our 11 year partnership with Te Maire, we welcome your inspection of our 2019 born sale stags.

As an industry we continue to travel these uncharted times but we know like any challenge this time will ultimately help build resilience and diversity for future strength. With the risk of COVID spreading and potentially further lockdowns, we felt it was best to take an early approach and offer these stags by way of private treaty.

This year's line-up of stags in the North Island contains excellent animals that present a good mix of our best Maternal and European Red Deer for breeding replacement hinds or advancing growth rate.

- **BIG GEOFF (Maternal - English Cross)** - This sire has certainly made his mark! After being used extensively upon his arrival, his sons have come through strongly after strategic mating with the exceptional WFC hinds. These animals are great for breeding your replacement hinds. Good growth and loin weights will see your venison production increase thanks to this exceptional progeny. Big Geoff also boasts an impressive CDeBV of -8.7 days.
- **CHURCHILL (Maternal - English)** - This stalwart sire's dominance within our stud will be scaled back from the 2021/2022 sale season. This year will therefore be one of your last chances to buy numbers of sons from this proven Maternal sire. In addition, we have a couple of exciting combinations of Churchill and Tui crosses, that have +20 W12eBV's and -5 on CDeBV - an exceptional combination for breeding replacement hinds.
- **BIG DON (European)** - A young sire coming through with outstanding growth rate, meat yield potential and a great temperament. These genetics are an awesome way to improve venison weights. This is the first offering of Big Don progeny and we're sure they won't disappoint.
- **MORTLACH (European)** - Another young sire coming through with growth rate and meat yield potential. We have sons up to 172 kg at 15 months, and W12eBV's up to 25.05 in this offering. These genetics will most certainly improve venison weights. Like Big Don this is the first year his progeny are offered for sale.

Please note once again we have made the decision to organise the freight on account of the purchaser, unless specifically requested otherwise. This is to minimise the risk of injury to your purchase/s by reducing the number of yarding's.

Should you have any questions, please do not hesitate to contact one of us.

Yours in farming,

A handwritten signature in black ink, appearing to read 'Michael Wilkins', written over a horizontal line.

PLEASE BRING THIS CATALOGUE WITH YOU ON THE DAY

History & Vision

We have been breeding deer for over five decades.

Our original bloodlines were sourced in the 1980's and 1990's and are based mainly on King Richard, a recognised champion sire, from Festl Park in Germany. We then crossed these German genetics with Fredrich to introduce Hungarian bloodlines to further enhance the venison growth rates and velvet production in our hind base.

In 2001 we initiated our first AI (Artificial Insemination) Programme, to introduce genetics from best in class sires. In addition, in 2004 we undertook our first Embryo Transfer (ET) Programme, identifying and multiplying the best genetics from our herd.

In 2008 we purchased the Stanfield Eastern European Red Deer stud, to strategically add substantial venison and antler enrichment to our breeding programme.

To add further venison depth to our hind base we then purchased the Doncaster Red Deer herd in 2012.

In 2015, in conjunction with Mt Hutt Station, we travelled throughout Europe and England to hand select World Leading Red Deer. After purchasing a number of stags, they were consolidated to England for further farming, where semen collection was undertaken for shipment back to our home farm in New Zealand.

Further, in 2018 we purchased the finest Woburn New Zealand herd, from Henrietta Dowager Duchess of Bedford. The stunning herd was originally sourced from the family's English Estate, one of the oldest managed deer herds in the world, dating back 100's of years.

As indicated by this brief historical insight, our dedication and investment (and that of other breeders whose herds we have purchased), is illustrative of our commitment to both the industry, and more specifically the ongoing development of our hind base.

Vision

Our aim is to produce a high value animal with a venison focus, from an efficient maternal weight hind using the latest technology and best genetics available.

To achieve this, we use world leading genetics and combine them with performance measures such as ultrasound scanning, CT scanning, DEERSelect, progeny testing and DNA testing.

Through recording key trait data, it is easier to mate the right hind to the appropriate stag to achieve specific breeding goals. During the selection process, we are constantly reviewing breed values, bloodlines and performance to date.

Our venison breeding programme employs the following foundations;

1. An **average adult hind body weight of 118+ kg**, which assists in creating satisfactory breeding efficiency. (This enables us to get this hinds progeny to the high value early spring market)
2. An **animal with a high carcass yield**, that also has an increased percentage of more valuable meat cuts, in order to deliver higher returns.
3. Temperament, fertility, constitution, type and then calving date are our key measures for **successful breeding**.
4. A **strong velvet base** delivers diversity and potential income over and above venison.

Genomic Opportunities for NZ Deer

For 25+ years GenomNZ has been conducting parentage analysis for the NZ Deer Industry. We offer a SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.

HERD SIRES

All sires featured can be found on our website

wilkinsfarming.co.nz

Pictured: WF 144/05 at 4 years

BIG GEOFF

Shown at 4 years
Maternal - English Cross

Shown at 3 years

Shown at 3 years

Big Geoff is an imposing stag within the herd. Although, we only purchased him in 2017, we are looking forward to his growth and velvet attributes coming to fruition.

Sired by Jefferson out of a general hind, Big Geoff is 1/2 English, 1/4 German and 1/4 European.

Big Geoff is appropriately named, given his impressive live weights of 249 kg at 3 years (sale day) and his W12eBV of 15.2 which is solid for this breed type.

As shown below, his impressive SA2 velvet at 3 years was 7.2 kg and he cut an additional 4 kg of regrowth. A massive total of 11.3 kg of velvet at 3 years of age.

Big Geoff is a well performing sire with a great nature.

AGE	YEAR	BODY WEIGHT (kg)	VELVET (kg)	GRADE

5 Years	2019	340	10.4	SA
6 Years	2020	352	12.1	SA

BIG DON

Shown at 2 years
European

Big Don was retained by Wilkins Farming from our 2016 born progeny. This stag has tremendous depth to his pedigree dominated by Doncaster breeding.

Big Don was bred from some of our very best genetics. This stag has exceptional growth rates and a 2 year sale day live weight of 280 kg. His W12eBV of 23.2, eye muscle of 35.35 and estimated loin weight of 4.85, sees Big Don as a serious venison producer. His CT scanning results are extremely impressive reinforcing his venison traits, scanning NO. 1 for the 3 key measures of loin weight, lean/CWT, and yield/LWT percentage.

He boasts a tremendously thickset body and is extremely quiet in nature which can be seen in his sons.

Cardrona's sire 403 — Shown at 6 years

Shown at 3 years

Cardrona is rated as one of our top sires. He delivers top growth rates and awesome velvet.

Sired by John Scurr's 403 (a stag with serious trophy traits and wow factor), Cardrona was bred at Netherdale from an English hind.

As indicated below, aged 3 years (sale day) Cardrona weighed 258 kg and cut an impressive 6.2 kg of SA2 velvet. As at October 2021, his W12eBV result of 9.2 is solid for this type.

Cardrona remains a strong and influential part of our herd, and his dominance in our breeding programme continues to be significant with good body, great nature and very clean beamed traditional velvet.

DECEASED	2017			

CHURCHILL

Shown at 5 years
Maternal - English

Shown at 2 years

Shown at 2 years

Churchill — a pure English sire whose growth rate is exceptional.

He was sired by Dartagnion, out of an Andrew III hind. Pure English, Warnham bloodlines. He was a massive English stag, with the largest 15 and 18 month live weights Stanfield have produced for this type.

As indicated below, as at October 2021, Churchill's W12eBV was +17.2, with an accuracy of 99% and 567 recorded progeny. We are very pleased that Churchill is ranked No. 1 for W12eBV, and has been for 9 years (English sire summaries DEERSelect)

A key member of our stag team through AI, Churchill's reliability delivers progeny with exceptional growth rates and consistent velvet credentials.

7 Years	2017	324	7.45	SA2
DECEASED	2018			

MORTLACH

Shown at 3 years
European

Mortlach is an exciting European stag with strong venison credentials.

This stag is sired by Lochinvar out of a Gemini hind, and was purchased by Wilkins Farming Co in 2019.

As shown in the table Mortlach has sound growth rates achieving 86.5 kg at weaning. The solid growth rates are backed by his W12eBV of 27.6.

We are anticipating excellent performance from this promising European sire.

AGE	YEAR	BODY WEIGHT (kg)	VELVET (kg)	GRADE

3 Years	2019	342	5.6	SA2
4 Years	2020	390	7.2	SA2

TUI
Shown at 4 years
European

Tui is an exciting venison stag, who excels in both growth rate and conception date measures.

He is sired by Corona who goes back to Alexei. His dam WF 127/05 is a full sister to our super sire WF 144/05 (bred through one of our ET programs.) It should be noted that the hinds in Tui's pedigree have excellent performance and are second to none in our herd.

He has an outstanding temperament, an attribute we are pleased his progeny are inheriting, along with strong growth rates.

As at October 2021, his W12eBV was +19.9 as highlighted in the table to the right. Tui has an exceptional CDeBV (conception date) at -8.7 days, which is an extremely valuable trait when trying to bring forward your fawning dates.

As you can see Tui's key traits can only but enhance your venison production through conception date and growth rate.

NOTABLE SIRES OF DAMS

All sires featured can be found on our website

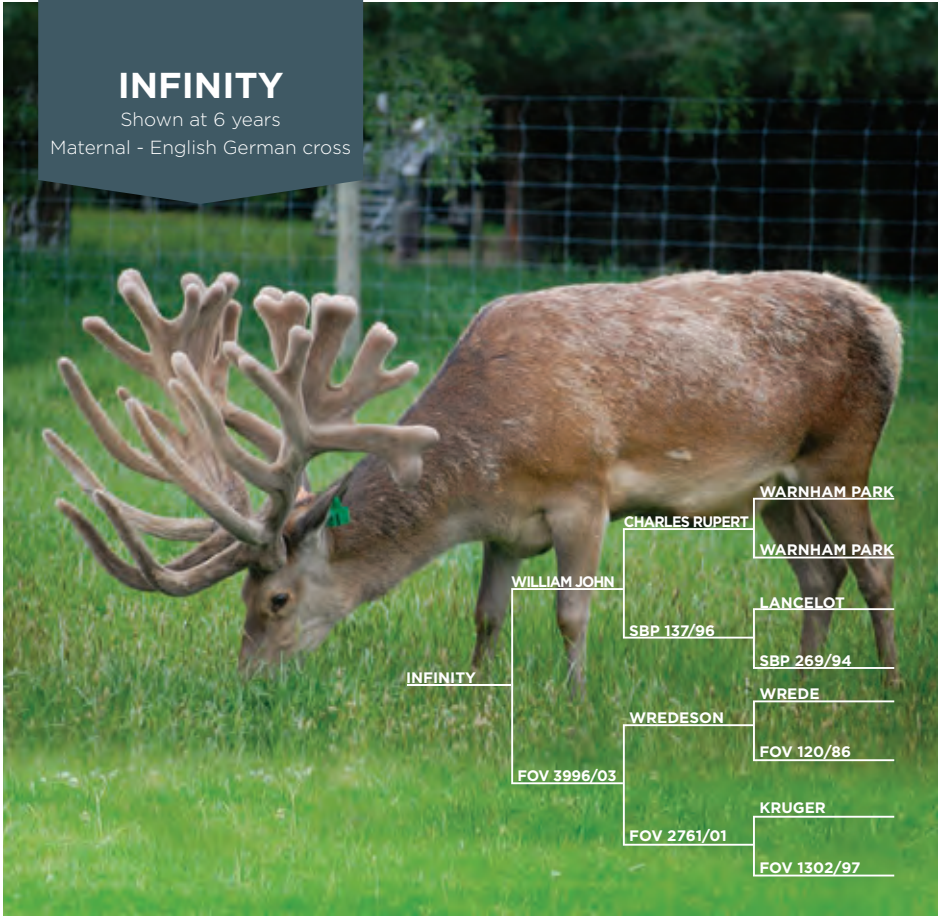

wilkinsfarming.co.nz

Pictured: Yesenin at 6 years

INFINITY

Shown at 6 years
Maternal - English German cross

Shown at 6 years

Infinity is an impressive English/German stag featuring outstanding antler attributes.

He is sired by William John out of a Wredeson hind. Wilkins Farming Co purchased his dam FOV 3996/03 while in calf from the Foveran hind sale, and Infinity was her resulting progeny. The incredible depth to his pedigree is testament to the stag he grew into.

At 5 years of age Infinity achieved an outstanding 612 inches of antler as highlighted in the table below.

We are continuing to breed strategically via AI with Infinity over our English/German hind base and are continually impressed by the progeny he leaves.

PEEL

Shown at 6 years
English/German

Shown at 4 years

Peel is an English German cross with a solid W12eBV and top velvet genetics.

Purchased from Peel Forest in 2011 and appropriately named Peel, this stag offers many valuable traits. Of note in the table below is his W12eBV combined with his solid velvet weights.

We are pleased Peel's progeny continue to inherit his high growth rate and strong velvet credentials.

If you're looking for a top all round maternal sire we highly recommend Peel.

No 1. EBV 2 year old at Stanfields 2006 stag sale with a huge body. He was an amazing 262 kg at 2 years which at the time of purchase was quoted as a world record.

Super quiet and thick set stag with good deep body conformation as you can see here.

He has a large number of progeny (519) across a number of herds which gives us confidence in the accuracy of his current BV.

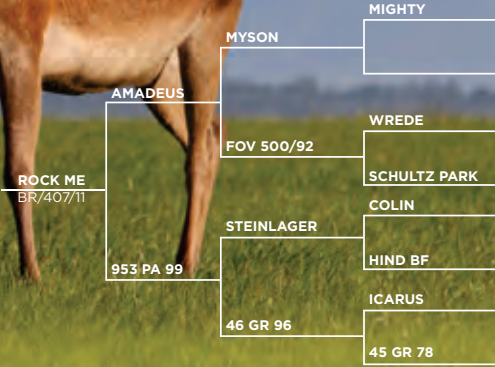

This stag has a current W12eBV of +17.6.

DECEASED	2009			

ROCK ME

Shown at 4 years
German/English

Shown at 2 years

Shown at 3 years

Rock Me has it all. He is an impressive stag that delivers well on all key traits.

He is sired by Amadeus, a Pure German who was bred by Foveran. Foveran described Amadeus as "the most amazing 2-year-old stag ever produced". Rock Me's dam is sired by Steinlager, bred by Black Forest and goes back to Colin who is a Festl Park German Sire. All in all this impressive breeding delivers a 7/8th German/English.

Impressive growth rates achieved which are rarely seen for this type. 148 kg at 15 months of age, and 244 kg at 2 years (sale day). These factors influenced our purchase of this stag from Brock Deer, and as at October 2019 Rock Me's W12eBV was +8.7.

In addition, Rock Me offers outstanding antler, as you will see from the photos and data below. For example, at 2 years his velvet was estimated to be in excess of 6 kg. In December 2014 Rock Me cut an impressive 3 year old head of 14.8 kg OG velvet, along with 20 kg of OG velvet as a 4 year old.

Rock Me's influence within our European and Maternal breeding programme cannot be underestimated with some of our best bodied and velvet antler animals sired by Rock Me.

YESENIN

Shown at 6 years
Eastern

Shown at 9 years

Shown at 9 years

Yesenin is an exceptional meat producing stag as well as providing strong velvet and antler credentials.

He was purchased from Stanfield stud and has provided a solid base for much of our hind herd. Yesenin has excellent constitution combined with solid body weights.

An all-purpose stag, Yesenin provides strong velvet credentials and as a 5 year old he produced a 24-point head

We are extremely pleased with his progeny to date. Yesenin is a serious contender as a sire of progeny for those looking to produce venison.

WF 144/05

Shown at 4 years
European

WF 144/05

WF 144/05 is one of our stalwart sires, offering exceptional growth rates, yield and hardiness.

Sired by Maximilian, out of WF 34/03, one of our best dams for breeding efficiency.

Ranked No. 1 for our born 2005 progeny for loin and carcass indexes, WF 144/05 continues to deliver well on all key performance measures.

As at October 2020, WF 144/05 had a current W12eBV of + 18.9, with a 99% accuracy from 756 recorded progeny.

WF 144/05 is an ideal multipurpose sire for breeding replacement hinds with strong maternal traits, as well as high growth rates for venison production. He has great conformation, and we are continually impressed with his constitution through, and after the roar.

WF 334/11

Shown at 3 years
European

WF 334/11 is a star European stag for our born 2011 progeny with respect to venison production.

Sired by our stalwart sire WF 144/05 bred from a Doncaster hind, WF 334/11 was the heaviest 11 month stag at 146.5 kg, and a massive 188 kg at 15 months.

As shown in the table on the right, WF 334/11 not only returned a W12eBV of +22.0 in October 2020, but is also ranked in the top 5 for every other trait in our born 2011 progeny.

In 2019 WF 334/11 was the sire of impressive two year old stags with excellent natures and weights up to 278 kg.

WF 334/11 is following in the footsteps of his father, WF 144/05 as an all-round super star stag.

Ali is an outstanding all-round English stag, with strong venison and velvet credentials.

Bred by Brock deer, Ali is sired by Parker out of a Cadillac hind, and was purchased by Wilkins Farming Co in 2018.

His 2 year weight of 216 kg, combined with 6 kg of velvet bodes well for the future of this stag within our Maternal breeding programmes.

In 2018, Ali won the Overall People's Choice Award at the Rising Stars velvet and hard antler competition. We are excited to see how his velvet and venison production develops with age.

CLEVELAND

Shown at 3 years
Maternal - English Cross

Shown at 3 years

Purchased from Crowley Deer for his impressive antler and body weights at 2 and 3 years.

Cleveland is sired by Rockafella, a renowned trophy sire thanks to his exceptionally wide, long, and heavy multi-pointed antler.

We hand selected Cleveland for his outstanding symmetrical antler that boasts very clean tynes and a thick beam.

This is a young sire who we expect will have a serious impact within our herd, thanks to his outstanding mix of velvet and antler quality, combined with a good body weight.

JAMESON

Shown at 15 months
European

Jameson is an exciting venison stag with outstanding growth rate.

Retained by Wilkins Farming Co, Jameson is sired by Mortlach out of a hind containing some of our very best European bloodlines.

Jameson scanned NO.1 for Eye Muscle Area (EMA) 48.51 at ultrasound scanning, and his impressive weights demonstrate unrivalled growth i.e.: 86 kg at weaning and a huge 219 kg at 15 months. At this time we understand these measures for growth and EMA are the highest numbers ever recorded for these traits in European red deer.

Jameson is 41 kg heavier than our previous heaviest animal at 15 months of age. It is worth noting that in our 2019 born we had a number beat the previous record, but Jameson is also 18 kg ahead of his peers.

His key traits are sure to further enhance your venison production. We eagerly await his impact within our breeding programmes and his continued performance as he matures.

AGE	YEAR	BODY WEIGHT (kg)
Weaning	2020	86
11 months	2020	166
15 months	2021	219
W12eBV		28.92
EMAcceBV		1.61
CDeBV		-5.8
Est Loin Weight		7.87
Eye Muscle Area		48.51

Management Tools

Definitions

W12eBV – the estimated breeding value (EBV) for weight at 12 months of age (yearling weight) expressed in kilograms (kg) of live weight.

EMAcEBV – the estimated breed value for eye muscle area (size of the muscle/meat on the ribs as measured by ultrasound scanning). The “c” very importantly stands for carcass weight corrected meaning you can select animals with more loin muscle area for their carcass weight.

CDeBV – the estimated breeding value for conception date, it is expressed in days. It is currently the only EBV for reproduction. Unlike many EBV a negative value is better, meaning hinds will calve earlier.

Estimated loin weight - Eye muscle area x the length of the loin muscle to give an estimated meat weight of the muscle measured in kilograms (kgs).

EMA - (Eye muscle area) – the area of the traced eye muscle (loin) over the 12th rib using ultrasound scanning.

DEERSelect

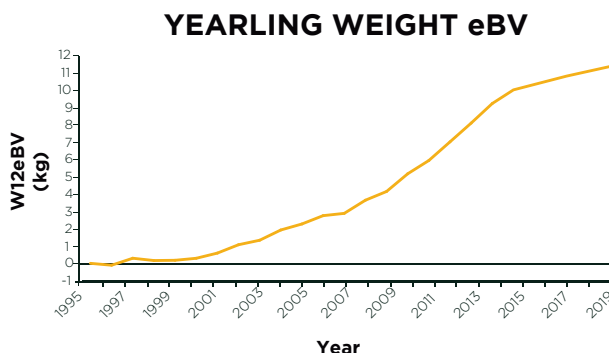

DEERSelect provides genetic evaluations for the deer industry. Evaluations are completed six times a year using all information in all connected herds to estimate genetic merit for individuals.

An estimate of the genetic merit of an individual for a trait relative to the average merit of all animals in the base year is called a breeding value.

The breeding values are based on the performance of an individual and all known relatives. Breeding values are corrected for environmental factors, such as mob, age of dam, sex and differences between seasons. As more information is collected the breeding values are updated.

Breeding values are expressed in the same unit as they are measured. For growth and velvet they are in kilograms and for conception date they are in days.

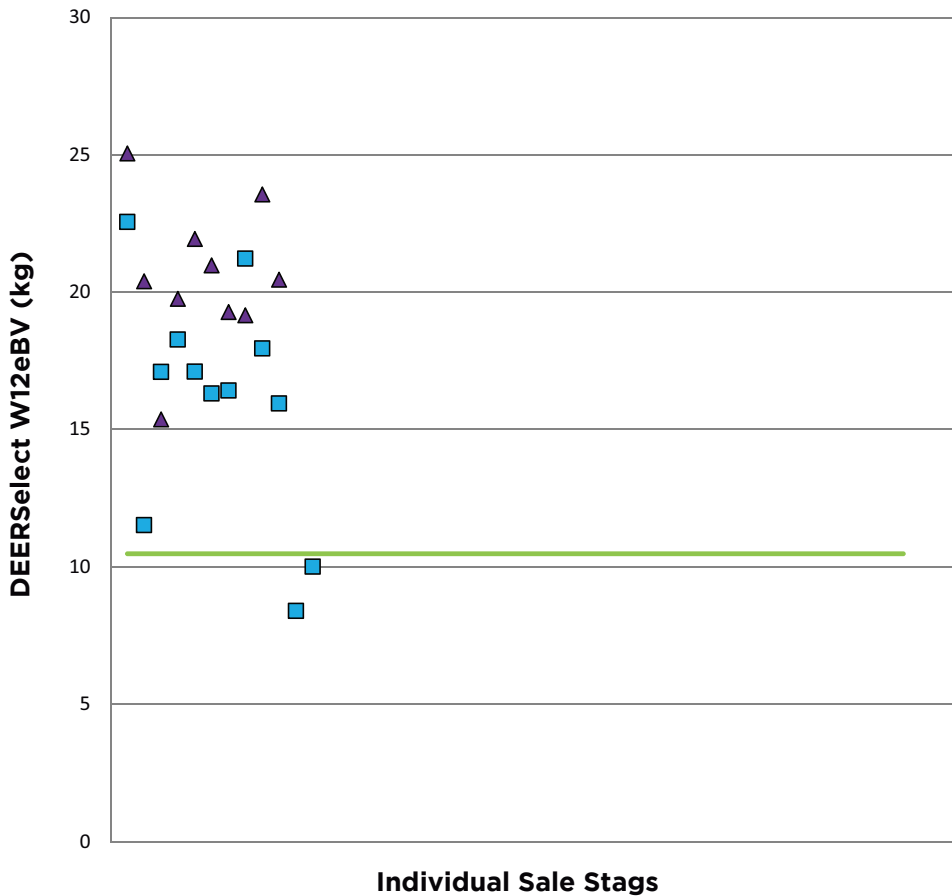

Genetic progress in 12 month weight Breeding Value across all DEERSelect herds over the last 20 years.

KEY ■ Maternal Stags ▲ Maternal Stags — DEERSelect Mean All 2019 Born

Scanning for Meat Yield

WILKINS FARMING CO IN CONJUNCTION WITH NEVILLE JOPSON (ABACUS BIO)

The initial focus of the Wilkins Farming Co genetic improvement programmes for venison production was on improving growth rates, for the several years weight of meat recovered from a carcass has also been measured and improved.

High growth rate animals achieve slaughter weights at an earlier age compared to low growth rate animals, an important aspect in running an efficient venison operation. Improving the weight of meat recovered from a carcass is also very important.

Wilkins Farming Co have been using CT and ultrasound scanning to “look inside” the body of an animal. Both CT and ultrasound are human medical technologies that have been adapted for livestock.

- Ultrasound scanning is used to measure the eye muscle area (EMA), which indicates meat production. We scan approximately 300 of our hinds per year with this technology to ensure improvements of this key trait.
- CT scanning provides a very effective measurement of the meat and fat within the carcass. CT measurements are as effective as slaughtering then dissecting out the meat from the fat and bone in the carcass, however this way the stag is still alive and can be used in our breeding programme. Due to the expense of CT scanning only a small number of stags are scanned each year – these stags are selected based on their sire and performance data.

The measurements from CT and EMA scanning are also entered into DEERSelect where BV's (breeding values) for performance are derived giving buyers the confidence that the animals purchased are an asset to their herd.

Using the aforementioned technologies, Wilkins Farming Co are advancing with our venison production through better carcass yields, as well as further enhancing the sale stags we offer to the market.

Checking width at the plant

Scanning loin depth

Maternal

WHY MATERNAL?

Maternal Red Deer are bred specifically as replacement hinds.

Maternal sires are a great solution to introduce to a European herd to stabilise by introducing the hardier influences from English and German traits.

The key Maternal attributes we look for are:

1. Good growth rates
2. Breeding efficiency including milking ability
3. Hardiness
4. Good meat yield i.e. loin size and meat to bone ratios
5. Type of animal i.e. good body conformation and constitution
6. Good temperament
7. High fertility
8. Velvet production

As shown Churchill in his profile Page 15, is New Zealand's most proven Maternal Sire (Number One for English Sire growth rate for 9 years).

Churchill shown at 5 years.

Eastern

WHY EASTERN?

Our Eastern deer are bred specifically for venison and velvet production. Our Eastern stud contains incredible depth with 30 years of selective breeding in New Zealand.

The key Eastern attributes we look for are:

1. High growth rate – Easterns are the largest type of Red deer and size is an important attribute
2. Early conception - Easterns mate earlier therefore calve earlier
3. Clean heavy beamed velvet and antler combined with length and width in beam that is not commonly seen in other Red Deer. Seldom do you see snags and bifurcations
4. Good temperament
5. Type of animal i.e. good body conformation and type

As shown below Vladimir clearly demonstrates the key attributes we strive for in our Eastern animals.

Vladimir shown at 7 years.

European

WHY EUROPEAN?

Our European Red Deer are bred specifically for venison production, while some can also be used for both Terminal and Maternal breeding programmes depending on particular bloodlines and objectives.

The key European Red Deer attributes we look for are:

1. High growth rate
2. Good meat yield i.e. loin size and meat to bone ratios
3. Type of animal i.e. good body conformation and constitution
4. Good temperament
5. High fertility
6. Velvet production

As shown below WF 144/05 demonstrates a perfect mix of all of the key European traits. View his profile on Page 41.

WF 144/05 shown at 4 years.

Health & Safety

The Wilkins Farming Co and Te Maire team are committed to health and safety. To ensure everyone's safety today we need you to adhere to our health and safety policies.

COVID19 - Standard National alert level protocol applies. If you are sick or unwell we ask you do not attend, otherwise please sanitise upon entry, scan in using the tracer app or sign the register upon arrival. Please wear a mask & social distance. Generally practice good hygiene whilst on site. We want to keep you and our staff safe. Our sales will comply with the current alert level and restrictions in place at such time. Please adhere to designated walkways whilst viewing our deer.

In the event of an emergency please follow one of our team's instructions. Emergency exits are located through the door you entered the building and at the large sliding doors at the rear of the room.

The assembly area is by the parking area across the yard from the shed.

If anyone has an accident whilst attending the sale please notify Pauline Pattullo from Wilkins Farming Co. A first aid kit will be on site.

Food and refreshments are available after the sale, there are both alcoholic and non-alcoholic drinks on offer.

If drinking alcohol please ensure you have a sober driver to get you home - we want to see you next year!

Conditions of Sale

Special Conditions

No animals, embryos or semen sold by Wilkins Farming Co or their germplasm, any subsequent progeny or germplasm, including the semen and germplasm of that progeny may be supplied to any third party without the express written permission of Wilkins Farming Co.

Conditions of Sale

1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements [No later than 24 hours prior to sale] are made with PGG Wrightson.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. Antler will be cut after sale and remain property of vendor unless advised differently by purchaser on sale day.
9. All sale stags have passed Johnes testing.
10. Wilkins Farming Co Breeding Herds have been TB tested clear and carry C10 plus status.
11. Wilkins Farming Co will stand by their stag's performance, though the vendor makes no guarantees.
12. Wilkins Farming Co and our employees accept no responsibility for any errors occurring within this catalogue.
13. Wilkins Farming Co will organise the freight on account of the purchaser unless requested otherwise.

HOST FARM

**GEORGE AND LAURA WILLIAMS, TE MAIRE
678 MATHESON ROAD, HAWKE'S BAY**

The Williams family are established Hawke's Bay farmers with vast experience in farming deer. They have been farming deer for 30 years and are the third generation of Williams on Te Maire. We are grateful to George and Laura for helping us bring our stags to the North Island.

All stags sold at the North Island sale are bred on our home property in Southland. As spikers these stags have been sorted, with an allocation trucked to the North Island prior to button drop before the sale date.

The South Island sale is the larger of the two sales, with the difference being the top six stags bred for venison, and the top pure Easterns with proven antler breeding lineage, will be sold from the home farm in Southland. The balance of the stags are then divided equally between the two sales.
