

HEINEK

Shown at 3 years
Maternal – English Cross

Shown at 2 years

Shown at 3 years

Heinek is an exciting venison stag with excellent growth rate and conception date measures.

Sired by our stalwart sire Tui – NO. 1 CDeBV stag out of a hind sired by Peel. His pedigree includes proven genetics on both sides. (See above). Heinek scanned NO.1 for Eye Muscle Area (EMA) at both CT and ultrasound scanning within the whole herd. He delivers good growth rates (weaning at 74 kg and 140 kg at 11 months.). He also offers an excellent CDeBV of -7.02 days.

Heinek’s mix of key traits including meat yield, growth rate, calving date and velvet production epitomise the type of maternal deer we strive to produce. We eagerly anticipate this stags impact within our breeding programmes.

AGE	YEAR	BODY WEIGHT (kg)	VELVET (kg)	GRADE
Weaning	2019	74		
11 months	2019	140		
15 months	2020	170
