

TUI

Shown at 3 years
European

Tui is an exciting venison stag, who excels in both growth rate and conception date measures.

He is sired by Corona who goes back to Alexei. His dam WF 127/05 is a full sister to our super sire WF 144/05 (bred through one of our ET programs.) It should be noted that the hinds in Tui's pedigree have excellent performance and are second to none in our herd.

He has an outstanding temperament, an attribute we are pleased his progeny are inheriting, along with strong growth rates.

As at October 2021, his W12eBV was +19.4 as highlighted in the table to the right. Tui has an exceptional CDeBV (conception date) at -8.7 days, which is an extremely valuable trait when trying to bring forward your fawning dates.

As you can see Tui's key traits can only but enhance your venison production through conception date and growth rate.

AGE	YEAR	BODY WEIGHT (kg)	VELVET (kg)	GRADE
3 Months	March	80
